EXAMINER'S AMENDMENT

1. Authorization for this examiner's amendment was given in a telephone interview with Mr. Nobuhiko Sukenaga (reg. # 39,446) on 2/24/2011.
2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.
3. In claim 32, line 3 after the word "being" the word -- PVDF -- has been deleted.
4. In claim 32, line 3 after the word "being" the phrase -- PVDF (poly(vinylidene fluoride)) -- has been inserted.
5. Please cancel claims 39-44 and 46-54.

REASONS FOR ALLOWANCE

6. The following is an examiner's statement of reasons for allowance:

A review of Applicant's arguments in the Paper filed 1/27/2011 and a review of the instant claims, which encompass the examiner's amendments as discussed with and accepted by Applicant's attorney, Mr. Nobuhiko Sukenaga (reg. # 39,446) in a phone interview on 2/24/2011 has convinced the examiner that the claims are allowable over the applied prior art of record.

7. Regarding independent claim 1 and the dependent claims, the prior art fails to teach or suggest a flexible unbonded pipe, said pipe comprising at least one polymer layer having a thickness of 4 mm or more, at least one film layer having a thickness of greater than 0 mm and 1 mm or less, and one or more armouring layers, said polymer

Art Unit: 1783

layer being at least 10 times as thick as the film, said film layer providing a fluid permeation barrier against one or more of the fluids methane, hydrogen sulphides, carbon dioxides and water, which is higher than fluid permeation barrier against one or more of the fluids methane, hydrogen sulphides, carbon dioxides and water, which is higher than the fluid permeation barrier provided by the polymer layer determined at 50 °C and a pressure difference of 50 bar, and said polymer layer being bonded to said film layer via one or more bondings selected from the group of chemical bondings and physical bondings, wherein said armouring layers are not bonded to said polymer layer and said armouring layers are not bonded to each other, and wherein said film layer and said polymer layer are of different materials.

8. The closest prior art of Glejbol et al. (WO 01/51839) teaches a flexible with an inner liner, however, fails to teach a polymer layer having a thickness of 4 mm or more and a film layer having a thickness of 0 mm and above and 1 mm or less with the polymer layer being bonded to the film layer via one or more bondings selected from the group of chemical bondings and physical bondings as well as several other limitations including and the polymer layer being at least 10 times as thick as the film, the film layer providing a fluid permeation barrier against one or more or all of the fluids methane, hydrogen sulphides, carbon dioxides and water, which is higher than the fluid permeation barrier provided by the polymer layer determined at 50 °C and a pressure difference of 50 bar.

9. Another prior art of Odru (US 6,098,667) fails to teach many of the limitations of the claims like Glejbol. Odru's polymer layer is not bonded to the film layer but rather spaced and is not at least ten times as thick as the film.
10. The secondary references of record do not teach or suggest the combined limitations not taught by Glejbol.
11. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
